ITINERARY 5

Cipollaio, Arni and
Passo del Vestito

Length:	87,8 km
Altitude peak:	1060 metres
Total rise:	1248 metres
Degree of difficulty:	●●●●○
Ideal period:	May/September
Excursion time:	5 hours

Starting from the Viareggio seafront near Galliano Café, go towards Forte dei Marmi that you'll reach after about 11,5 km on the flat. At the traffic lights in front of the pier turn right and contemplate the Fort. Then go along the main road following the signs to Querceta. At the roundabout at the beginning of the residential area turn left and immediately after turn right over an over-pass before the hamlet of Ripa.

Then our excursion continues reaching Seravezza, where the road curls in gentle slopes leading through Ruosina to the fork for Pontestazzemese. Here keep your left following road signs to Castelnuovo and begin to rise to Cipollaio. The slope has a constant and not hard gradient, but it's 13 km long and requires a good training and a physical fitness. After 4 km from the fork you'll reach Retignano, and after

Passo del Vestito

other 3 km you'll reach Levigliani, famous for the Corchia caves, a natural cavern that you can visit all year round (for information 0584 778405 www.antrocorchia.it). After 5 km you'll reach the Cipollai tunnel where you can have a break and admire the scenery. The long tunnel (1,2 km) is badly lit and it is at the beginning of a descent along breathtaking defiles. After 1 km at the fork turn right and follow road signs to Massa. Here the harder part of our excursion begins, with stretches with a 10% and a 12 % gradient inside Arni hamlet and after the tunnel also (badly lit). When you reach the peak, with splendid weather especially, your eyes are filled with unexpected views and at the end of the Vestito tunnel the scenery is more amazing. Be careful

when you are in this tunnel because it's long and badly lit and the asphalt is full of perils. Here the long and steep descent begins during which you can admire wonderful scenery

Antona

ies that through Antona and San Carlo will accompany you until Massa. Here reach the seafront of Marina di Massa through Viale Roma, a wide sloping road. At the seafront turn right and going through Cinquale, Forte dei Marmi, Marina di Pietrasanta and Lido di Camaioire you'll finally return to your starting point. Obviously, being a ring itinerary, you can rise to passo del Vestito going through Massa, with a longer but more gentle rise (so to speak).

Papa Giovanni XXIII Statue, Antona

Bank Services

Agenzie in Viareggio, Lido di Camaioire, Forte dei Marmi, Marina di Pietrasanta, Querceta, Ripa
